

Comparing Decimals — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

COMPARING DECIMALS

1. Line up the decimal points.
2. Pad with zeros so both have the same length.
3. Compare digit by digit from the left.
4. The first bigger digit decides.

Example: 0.7 vs $0.65 \rightarrow 0.70$ vs $0.65 \rightarrow 0.7$ is bigger.
