

Ordering Decimals — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

ORDERING DECIMALS

1. Pad every decimal to the same number of places.
2. Compare digit by digit from the left.
3. Order them, then write the original forms.
4. Count your list matches the question.

Example: 0.5, 0.45, 0.405 → 0.500/0.450/0.405 → 0.405 < 0.45 < 0.5
