

Comparing Fractions — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

COMPARING FRACTIONS

1. Same denominators → compare numerators. Larger numerator = bigger fraction.
2. Different denominators → find equivalent fractions first, then compare.

Example: $\frac{1}{2} = \frac{2}{4} > \frac{1}{4}$ · Bigger piece = bigger fraction.

Answers: 1: < 2: < 3: >
