

Mixed Numbers — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

MIXED NUMBERS

1. Improper → Mixed: divide numerator by denominator; whole number = quotient; remainder over denominator.
2. Mixed → Improper: multiply whole number by denominator; add the numerator; keep the denominator.

Example: $\frac{11}{4} = 2 \frac{3}{4} \quad \cdot \quad 2 \frac{3}{4} = \frac{11}{4}$
