

Angles in Quadrilaterals — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

ANGLES IN QUADRILATERALS

1. Quadrilateral angles always total 360° .
2. Missing angle = $360 - \text{the known three}$.
3. Parallelogram: opposite angles equal; neighbours total 180° .
4. Rectangle/square: all four are 90° .

Example: $360 - 90 - 85 - 100 = 85^\circ$
