

Coordinates (First Quadrant) — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

COORDINATES (FIRST QUADRANT)

1. (x, y) = (across, up).
2. Start counting from the origin $(0, 0)$.
3. x first, y second — order matters.
4. Brackets and a comma every time.

Example: rectangle $(1,1)$, $(5,1)$, $(5,4)$ → fourth corner $(1,4)$.
