

Measuring and Drawing Angles — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

MEASURING AND DRAWING ANGLES

1. Centre on the vertex; 0° baseline along one arm.
2. Read the scale that starts at 0° on that arm.
3. Estimate acute/obtuse first as a check.
4. To draw: line, mark the degrees, join and label.

Example: looks acute + scales show 65/115 → it's 65° .
