

Parallel and Perpendicular Lines — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

PARALLEL AND PERPENDICULAR LINES

1. Parallel: same direction, never meet (arrow marks).
2. Perpendicular: meet/cross at exactly 90° (square mark).
3. Crossing at any other angle: neither.
4. Rectangle: opposite sides parallel, adjacent sides perpendicular.

Example: square → opposite sides parallel, neighbours perpendicular.
