

Converting Mass — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

CONVERTING MASS

1. $1000 \text{ g} = 1 \text{ kg}$.
2. $\text{kg} \rightarrow \text{g}$: $\times 1000$ (3 places left).
3. $\text{g} \rightarrow \text{kg}$: $\div 1000$ (3 places right).
4. Same units before adding or comparing.

Examples: $2.5 \text{ kg} = 2500 \text{ g}$ · $750 \text{ g} = 0.75 \text{ kg}$
