

Imperial and Metric Units — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

IMPERIAL AND METRIC UNITS

1. 1 inch = 2.5 cm · 1 foot = 12 inches
2. 1 mile $\approx$ 1.6 km (so 5 miles $\approx$ 8 km)
3. 1 pint $\approx$ 568 ml · 1 kg $\approx$ 2.2 lb
4. Sense-check the direction: miles $\rightarrow$ km gets bigger.

Example: 15 miles $\times$ 1.6 $\approx$ 24 km
