MONEY CALCULATIONS

1. 100p = £1; write money with 2 decimal places.
2. Same form (all £ or all p) before calculating.
3. Change = payment – cost (or count up).
4. Check division answers by multiplying back.

Example: $£10 - (£2.75 + £3.20 + £1.60) = £10 - £7.55 = £2.45$
