

Comparing with Percentages — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

COMPARING WITH PERCENTAGES

1. Different totals? Never compare raw scores.
2. Convert each to a percentage.
3. Compare the percentages.
4. Keep exact values — don't round early.

Example: $27/30 = 90\%$ vs $22/25 = 88\%$ → first is better.
