

Percentage Change — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

PERCENTAGE CHANGE

1. Change = difference between new and original.
2. Divide the change by the ORIGINAL.
3. Convert the fraction to a percentage.
4. Say whether it's an increase or a decrease.

Examples: 20→25: $5/20 = 25\%$ increase · £250→£200: $50/250 = 20\%$ decrease
