

Percentage Decrease — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

PERCENTAGE DECREASE

1. Find the percentage of the original amount.
2. SUBTRACT it from the original.
3. Decrease by 25% = keep 75% of the original.
4. Check: the answer must be smaller than you started with.

Example: £60 – 25% → 25% of £60 = £15 → £45
