

Percentage Increase — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

PERCENTAGE INCREASE

1. Find the percentage of the original amount.
2. ADD it to the original.
3. Increase by 20% = 120% of the original.
4. Check: the answer must be bigger than you started with.

Example: £40 + 20% → 20% of £40 = £8 → £48
