

Sharing in a Ratio — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

SHARING IN A RATIO

1. Add the ratio numbers → total parts.
2. Divide the amount by total parts → one part.
3. Multiply one part by each ratio number.
4. Check the shares total the original amount.

Example: £20 in 3:2 → 5 parts → £4 → £12 and £8.
