

# What Is Ratio? — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

## WHAT IS RATIO?

1.  $a : b$  = 'a of the first for every b of the second'.
2. Number order follows word order.
3. The ratio is a repeating pattern, not fixed amounts.
4. Total parts = add the ratio numbers.

---

**Example:** 4 apples, 7 oranges → apples : oranges = 4 : 7.
