

Line Graphs — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

LINE GRAPHS

1. x-axis: time. y-axis: the measurement.
2. Point value: up from the time, across to the axis.
3. Slope up = increase; down = decrease; steeper = faster.
4. Only continuous data belongs on a line graph.

Example: peak at 1pm (16°); 1pm→5pm cooled by $16 - 10 = 6^{\circ}$.
