

The Mean — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

THE MEAN

1. Mean = total $\div$ count.
2. Add every value; count every value.
3. Reverse: total = mean $\times$ count.
4. Missing value = needed total – current total.

Examples: 4,7,6,3 $\rightarrow$ $20 \div 4 = 5$ · mean 7 of 5 tests $\rightarrow$ total 35.
