

Paper Folding and Hole Punching — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

PAPER FOLDING AND HOLE PUNCHING

1. Holes = punches $\times$ 2 per fold layer punched through.
2. Eliminate wrong-count options immediately.
3. Unfold last-fold-first, mirroring across each line.
4. Mirrored holes keep height and equal distance.

Example: 1 fold + 1 punch $\rightarrow$ 2 holes, mirrored across the fold at the same height.
