

Earth and Space — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

EARTH AND SPACE

1. Day/night: Earth spins once every 24 hours.
2. A year: Earth orbits the Sun (365¼ days).
3. Seasons: Earth's tilt makes hemispheres lean toward/away from the Sun.
4. The Moon reflects sunlight and shows phases as it orbits Earth.

Example: UK tilts toward Sun → summer; Australia tilts away → winter.
