

The Skeleton and Muscles — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

THE SKELETON AND MUSCLES

1. Skeleton: support, protection, movement.
2. Bones meet at joints; bones are living tissue.
3. Muscles pull (contract) — never push.
4. Antagonistic pairs (biceps/triceps) move joints both ways.

Example: bending the elbow — biceps contracts, triceps relaxes.
