

Antonym Pairs — Cheat Sheet

11+ Maths Guide · Year 5-6 · Keep this by your desk

ANTONYM PAIRS

1. Opposites share a scale — find the dial first.
2. Sweep all combinations.
3. The 'not' test: 'not X' $\approx$ Y confirms opposition.
4. Prefer exact oppositions over loose ones.

Example: ancient↔modern (age dial) · guilty↔innocent (exact).
